EDUCATION

- Nirma University, Ahmedabad, Gujarat, India**
Bachelor of Technology - Computer Science and Engineering; CGPA: 9.21 July 2023 – June 2027
- Auxesia English School** Mehsana, Gujarat, India
Higher Secondary School Science Stream – 91% (A1 Grade) 2021 – 2023
 - Secured **Top 60 rank in Gujarat & District Topper of Mehsana** in Class 12 Gujarat Board Exam.
 - Achieved **Rank 80 in ACPC Counselling** across all of Gujarat (Board + GUJCET combined).

SKILLS SUMMARY

- Languages:** Java, Python, SQL, JavaScript, TypeScript, C++, Go
- Frameworks:** Spring Boot, Node.js, Express.js, React.js, Next.js, FastAPI, Flask, Flutter, Streamlit
- AI/ML:** PyTorch, TensorFlow, Hugging Face Transformers, LSTM, Random Forest, RAG, pgvector, FAISS
- Databases:** PostgreSQL, MySQL, MongoDB, H2, Redis
- DevOps & Cloud:** Docker, Kubernetes, AWS (ECS Fargate, RDS, MSK, ECR, ALB, Secrets Manager), Azure, Git, GitHub
- Tools & Protocols:** Apache Kafka, WebSockets, Socket.IO, REST APIs, JWT, Spring Security, Maven, Postman
- Concepts:** Microservices, RBAC, Agile/Scrum, CI/CD, Application Resiliency, Big Data, OOP, DSA, OS, DBMS, Machine Learning, Deep Learning

CODING PROFILES

- LeetCode** (het.patel485) – **Knight Badge** | Max Rating: **1866** | **700+ problems solved** | **365-day streak** | Highest Contest Rank: **503** (Top 6% globally)
- Codeforces** (het.patel485) – **Expert** | Max Rating: **1605** | **550+ problems solved** | Highest Rank: **1039** in Div 3 Round 1054
- GeeksforGeeks** (phet34jh8) | Active problem solver and contributor

EXPERIENCE

- JPMorgan Chase – Software Engineering Job Simulation on Forage** Remote
Software Engineering Virtual Intern January 2026
 - Integrated **Apache Kafka** into **Spring Boot** microservice to consume and deserialize high-volume transaction messages.
 - Implemented transaction validation and persistence with **Spring Data JPA** and **H2 database**, including entity modeling.
 - Connected service to external **REST Incentive API** using RestTemplate; developed REST endpoint for querying user balances.
 - Verified end-to-end system behavior using **Maven test suites**, **troubleshooting** reliability issues across message ingestion and database operations.
- GirlScript Summer of Code** Remote
Open Source Contributor October 2024 – November 2024
 - Contributed to **10+ open source projects** by developing and implementing UI functionalities using **React.js**, Bootstrap, and Tailwind CSS.

PROJECTS

- Smart Incident Response System – Cloud-Native AI Incident Management Platform** 2026
Java 21, Spring Boot, Apache Kafka, PostgreSQL, pgvector, Docker, Kubernetes, AWS
 - Architected a **cloud-native microservices platform** using **Java 21, Spring Boot & Apache Kafka**, decomposed into **4 independent services** with async event-driven messaging; containerized **7 services** via **Docker Compose** and designed **AWS deployment** (ECS Fargate, RDS, MSK, Secrets Manager) with **Kubernetes manifests** for production.
 - Built an **AI-powered RAG resolution engine** embedding incident descriptions into **768-dimensional vectors** via Google Gemini, performing cosine similarity search on **PostgreSQL + pgvector** to generate structured root cause analysis and step-by-step fixes.
 - Implemented **JWT-based auth with RBAC** (ADMIN/DEVELOPER roles) via Spring Security; developed **React 18 + Vite** dashboard with real-time incident CRUD and Kafka-driven email escalation alerts for HIGH/CRITICAL severity incidents.
- ThreatOps.ai – AI-Powered Security Orchestration & Response Platform** 2026
Python, FastAPI, React, Kubernetes, PyTorch, Socket.IO
 - Architected end-to-end **SOAR platform** with microservices using **Python (FastAPI), React, and Kubernetes** to detect and mitigate cyber threats across healthcare, agriculture, and urban IoT infrastructures.
 - Developed **AI-driven threat detection engine** with **PyTorch LSTM** models identifying **12+ attack vectors** (SQL injection, DDoS, brute force, IoT spoofing) with **85%+ confidence scores** trained on CICIoT2023 dataset.
 - Built real-time telemetry pipeline processing system metrics through **6 microservices** with Socket.IO; **automated incident response workflows**, eliminating manual toil from **hours to seconds**.
- LiveHive – Real-Time Meeting Platform** Deployed on Render
Node.js, Express.js, React.js, MongoDB, Socket.IO, WebRTC August 2024
 - Developed a real-time meeting platform handling **10,000+ concurrent WebSocket connections** with **Socket.IO** across video, audio, screen sharing, and **E2E encrypted chat**.
 - Built responsive multi-user UI with **WebRTC** for low-latency media streaming; deployed on cloud with full CRUD and JWT-secured user sessions.

ACHIEVEMENTS

- Winner – 1st Place** at Ingenium Hackathon 2026, Ahmedabad University.
- Runner-Up** at HackAMINED 2026, Nirma University – built an **agent-based video editing application** among **2,000+ participants**.
- Oracle Cloud Infrastructure 2025 Certified Foundations Associate** (November 2025).
- Awarded **Certificate of Academic Excellence** by Nirma University.
- 1st place** in CodeAdda Premier League – college-wide competitive programming contest.
- Ranked **Top 35 teams** from college at **Smart India Hackathon** (regional level).

POSITION OF RESPONSIBILITY

- Computer Society of India – Core Committee Member** Ahmedabad, India
Event Organizer and Contest Developer January 2024 – Present
 - Led a team of **50+ executives** to organize **Cubix 2025** for **250+ participants** across **6 competitive events**.
 - Developed the official CSI website using **MERN stack**, supporting **1,000+ concurrent users** and registrations; deployed on cloud using **Agile methodologies** to maintain security and application resiliency with a **team of 4**.
